

Serial No.: 09/539,927

Attorney's Docket No.: 10559/151001
Intel Corporation: P7976Amendment to the Claims:

This listing of claims replaces all prior versions, and listings, of claims in the application:

1. (Currently Amended) A machine-implemented method, comprising:

obtaining policy rules, and simplifying said policy rules, ~~at least to remove duplicate policy rules and~~ to form simplified policy rules, wherein a policy rule comprises one or more conditions and one or more values associated with the one or more conditions, the one or more conditions to be evaluated for network communications based on the one or more values, and said simplifying comprises eliminating at least one of any redundant conditions and values from the policy rule based at least in part on condition-type information of the one or more conditions; and

based on said simplified policy rules, creating an access control list adapted to configure a network device; and

using the access control list to generate access filters that configure the network device to control network communications in the network device.

2. (Previously Presented) The method of claim 1 further comprising expanding the policy rules into value groups that

Serial No.: 09/539,927

Attorney's Docket No.: 10559/151001
Intel Corporation: P7976

represent conditions occurring in the network device associated with the policy rules.

3. (Previously Presented) The method of claim 2 wherein said simplifying comprises excluding conditions that would otherwise be implied by policy rules.

4. (Original) The method of claim 3 further comprising resolving inconsistent conditions that result from expanding the policy rules and excluding the policy rule conditions.

5. (Original) The method of claim 1 further comprising creating at least one array of included or excluded conditions from the policy rules.

6. (Previously Presented) The method of claim 5 wherein generating the access filters further comprises:

adding filters adapted to control access of a device to a component other than the network device in the network connected to the network device.

Serial No.: 09/539,927

Attorney's Docket No.: 10559/151001
Intel Corporation: P7976

7. (Original) The method of claim 6 further comprising generating deny filters by combining the at least one array of excluded conditions and the at least one array of included conditions.

8. (Original) The method of claim 6 further comprising generating permit filters by combining the at least one of the arrays of the included conditions with the remaining arrays of included conditions.

9. (Currently Amended) A system computer network, comprising:

a first device adapted to disseminate policy rules in the a network; and

a second device adapted to receive the policy rules disseminated on the network by the first device and adapted to perform operations comprising:

simplifying said policy rules, ~~at least to remove duplicate policy rules and~~ to form simplified policy rules, wherein a policy rule comprises one or more conditions and one or more values associated with the one or more conditions, the one or more conditions to be evaluated for network communications based on the one or more values, and

Serial No.: 09/539,927

Attorney's Docket No.: 10559/151001
Intel Corporation: P7976

said simplifying comprises eliminating at least one of any redundant conditions and values from the policy rule based at least in part on condition-type information of the one or more conditions;

based on said simplified policy rules, creating[[e]] an access control list adapted to configure a network ~~the at least one device from the filters~~; and

~~to using~~[[e]] the access control list to generate access filters that configure the network device to control network communications in the network device ~~from the translated policies~~.

10. (Original) The system of claim 9 wherein the second device further comprises a permit filter.

11. (Original) The system of claim 10 further comprising a plurality of data-storage devices adapted to permit access to the second device.

12. (Original) The system of claim 9 wherein the second device further comprises a deny filter.

Serial No.: 09/539,927

Attorney's Docket No.: 10559/151001
Intel Corporation: P7976

13. (Original) The system of claim 12 further comprising a plurality of data-storage devices adapted to deny access to the second device.

14. (Currently Amended) An article comprising a computer-readable medium which stores computer executable instructions for managing policy rules on a network, the instructions causing a computing[[er]] machine to perform operations comprising:

simplifying said policy rules, at least to remove duplicate policy rules and to form simplified policy rules, wherein a policy rule comprises one or more conditions and one or more values associated with the one or more conditions, the one or more conditions to be evaluated for network communications based on the one or more values, and said simplifying comprises eliminating at least one of any redundant conditions and values from the policy rule based at least in part on condition-type information of the one or more conditions;

based on said simplified policy rules, creating[[e]] an access control list adapted to configure a network device
~~the devices from the simplified rules; and~~

Serial No.: 09/539,927

Attorney's Docket No.:10559/151001
Intel Corporation: P7976

using[[e]] the access control list to generate access filters that configure the network device to control network communications in the network device.

15. (Currently Amended) The article of claim 14 wherein the operations further ~~compriseing instructions to~~ expanding the policy rules into value groups, wherein value groups represent conditions occurring in the network device associated with the policy rules.

16. (Currently Amended) The article of claim 15 wherein ~~the instructions to translate the policy rules simplifying~~ further includes ~~instructions to excluding~~[[e]] conditions that would otherwise be implied by the policy rules.

17. (Currently Amended) The article of claim 16 wherein ~~the instructions to translate the policy rules simplifying~~ further includes ~~instructions to resolving~~[[e]] inconsistent conditions that result from expanding the policy rules and excluding the policy rule conditions.

18. (Currently Amended) A network device, comprising:

Serial No.: 09/539,927

Attorney's Docket No.: 10559/151001
Intel Corporation: P7976

a configurable management process located on the network
device having instructions to effect operations comprising:

receiving[[e]] the policy rules in a ~~the~~ network
device;

translating[[e]] the policy rules ~~into a set of~~
simplified rules ~~at least removing duplicate parts of said~~
~~rules to form said simplified rules, wherein a policy rule~~
~~comprises one or more conditions and one or more values~~
~~associated with the one or more conditions, the one or more~~
~~conditions to be evaluated for network communications based~~
~~on the one or more values, and said translating comprises~~
~~eliminating at least one of any redundant conditions and~~
~~values from the policy rule based at least in part on~~
~~condition-type information of the one or more conditions;~~

creating[[e]] an access control list adapted to
configure the network device from the simplified rules; and

using[[e]] the access control list to generate access
filters that configure the network device to control network
communications in the network device.

19. (Original) The device of claim 18 further comprising a
connection to an external network.

Serial No.: 09/539,927

Attorney's Docket No.: 10559/151001
Intel Corporation: P7976

20. (Original) The device of claim 19 wherein the external network is a local area network.

21. (Original) The device of claim 19 wherein the external network is the Internet.

22-24. (Cancelled)
